

WINTER 2023: EPIDEMIOLOGY 360

EXPLORING THE HIV/AIDS PANDEMIC

Who gets HIV and how?

How can HIV be prevented/treated?

What is being done to end the epidemic?

- Explore the historical, public health, clinical, and social aspects of HIV infection;
- Examine the epidemiology of the United States and global HIV/AIDS epidemic; and
- The course lays the foundation for pursuing a degree and career in public health, epidemiology, global health, infectious diseases, or health/medicine.

Epi 360 (cross-listed as GH 360) is a great addition to public health and pre-med coursework.

No prerequisites. W credit is available.
