

## Global Laboratory Systems

Course: LAB M 549/GH 549 (1 CR)

March 28 - May 30, 2023

Tuesdays from 3:30 - 4:50 PM

Health Sciences Education Building (HSEB) 125

The goal of this interactive seminar course is to educate students on the role that clinical and public health laboratories play in a national public health system, both here in the US and globally. Students that complete this course will have a greater understanding of the functional components of a laboratory system including critical laboratory functions for patient and public health, and better understand the importance of quality laboratory information on public health policy making.

Instructor:

Olusegun O. Soge, PhD  
Assistant Professor, Departments of Global Health and Medicine  
Adjunct Assistant Professor, Department of Laboratory Medicine and Pathology  
Director, Neisseria Reference Laboratory & Chlamydia Laboratory  
Partner, West Antibiotic Resistance Laboratory Network

Eligibility: No prerequisites are required to enroll in this course.

Audience: Students studying health care delivery, including laboratory sciences and clinical practice with an interest in global health are encouraged to enroll. Both undergraduate and graduate students are welcome.
