

# Neuroscience Undergraduate Reading Program (NURP)

Winter 2024 Quarter

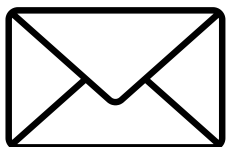

**A mentorship program where undergrads are paired with a grad student or post-doc to improve science literacy and science presentation skills**

What it entails:

- Attend weekly meetings to discuss a science paper assigned by your mentor
- Prepare a scientific presentation (workshop to be held near end of quarter)
- Present at the NURP end-of-quarter mini symposium

**Apply here:** <https://forms.gle/r5CDZLqgahXP3qai6>

*app deadline: January 1st at 11:55pm*

# Undergrad Testimonials

Piper Zhang  
*Aut23, 2nd yr*

---

"NURP is really an amazing program that helps you to dig into any neuroscience topic you're interested in. I didn't have a lot experience in reading scientific papers before, but NURP gives an opportunity to learn it with the help of a mentor, which makes paper reading much easier and more interesting. At the end of the quarter you also have a chance to share your cool discoveries in neuroscience with others. It was a very enjoyable experience."

Aditi Dwivedy  
*Aut23, 2nd yr Psych*

---

"NURP has been an amazing experience! I was well matched with my mentor, who was very receptive of my interests, and the meetings were all flexible to my schedule. Additionally, the ability to present helped me develop a lot of important career-specific skills and was a great way to end the quarter."
