

Supporting Undergraduate Research Experiences in Environmental Health (SURE-EH)

The Supporting Undergraduate Research Experiences in Environmental Health (SURE-EH) program provides research opportunities to UW undergrads, including those from groups underrepresented in the biomedical and behavioral sciences, with a meaningful opportunity to work with experienced faculty on a research project addressing the relationship between environmental exposures and human health.

With funds provided by a [NIEHS](#) grant, SURE-EH trainees work as paid student researchers for up to 2 years: up to 40 hours per week during summer and part-time (up to 13 hours per week) during the academic year. SURE-EH trainees will also be asked to present their research every spring at the UW Undergraduate Research Symposium and attend program sponsored events and courses throughout their appointment.

We are currently looking for undergraduate students to work on the following research projects (full descriptions and desired qualifications are on our website):

- **Project # 1:** Co-Developing and evaluating wildfire smoke and pesticide safety messaging for agricultural workers
- **Project # 2:** Impacts of enteric pathogen infections in low- and middle-income countries
- **Project #3:** Measuring exposure to hazards in the environment and occupational settings in the U.S. and across the world

- Learn more about SURE-EH and eligibility requirements on our website: <http://deohs.washington.edu/sure-eh>
- Learn about our current open positions and gain access to the application here: <http://deohs.washington.edu/apply-sure-eh>

SURE-EH will start accepting applications to the program **April 15, 2024 at 9:00a.**
Applications will close on May 3, 2014 at 5:00p.
